Test Report

October 2020

S-CB-S2-CMK Group 3

Table of Contents

TC-01:

Unsuccessful when using given test data.

We typed in correct data system gives error (Input string in incorrect format) first and then logs in

Note: Logging in doesn't work sometimes and no message is passed.

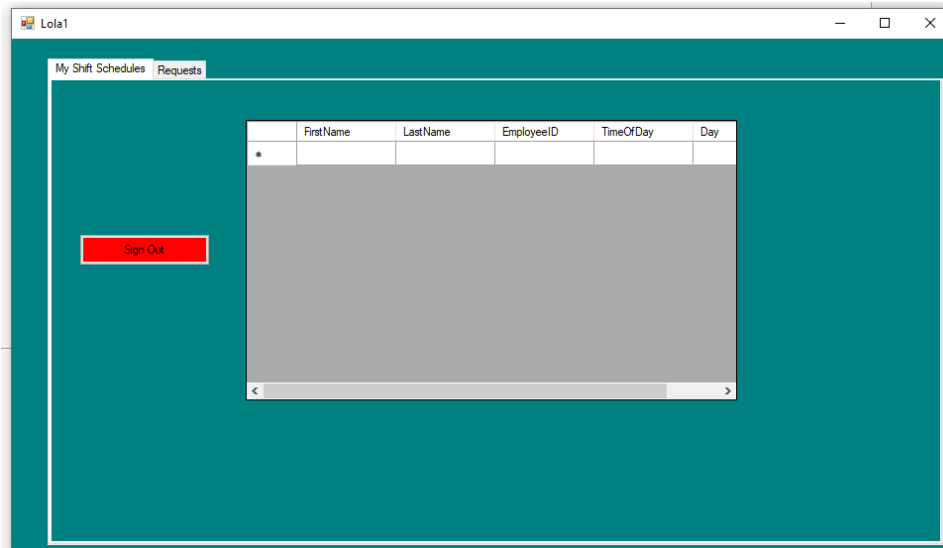

TC-02:

Unsuccessful

No error message: System does not notify user about wrong password or username

TC-03

Successful

But it only showed the DataGrid view with no data in it.

TC-04

Unsuccessful

With the given user login, we couldn't get to an attendance form. If there is a form for attendance, then it is not clear to a user how to get there.

TC-05

Unsuccessful

We didn't know which button to press to get to the expected result which makes it unclear.

Tc-06

Unsuccessful

It gets a notification that the restock request has been sent even without any values inputted.

And no information about a restock request is seen in the admin form.

Tc-07:

Successful

Note: the admin should not be given the ability to add an employee ID this should be auto generated

TC-08:

Successful

TC-09:

Unsuccessful

We had to use the employee Id to assign shifts and not the employee name, which means the instructions weren't valid.

General Note:

The system gives an error after few SQL operations have occurred
